

Silver Canine Elite

To help your adult dog enjoy a happy, healthy life, this preventive care visit includes the following:

Chemistry profile and complete blood count (CBC)

A comprehensive blood chemistry profile, including SDMA, provides information about your dog's kidneys, liver, and pancreas, as well as other functions of the body, such as blood sugar, and hydration. A CBC can identify infection, Inflammation, and anemia.

Infectious disease screening

This screening identifies whether your dog has been exposed to heartworm or other important tick-borne diseases.

Fecal test

This test checks for intestinal parasites that may live in your dog's gastrointestinal tract. Since they are usually hidden from view, the only way to detect and identify most intestinal parasites is by doing a fecal test.

Thyroid function test

A thyroid function test detects whether or not your dog's thyroid gland is functioning properly. Thyroid disease is very common in older dogs.

Complete urinalysis

This analysis assesses the overall health of your dog's urinary tract, including the kidneys and bladder. It identifies infection or inflammation in the urinary tract.

Regular total cost \$489.40
