

## Silver Feline Essential

To help your cat enjoy a happy, healthy life,  
this preventive care visit includes the following:

### **Chemistry profile and complete blood count (CBC)**

A baseline blood chemistry profile, including SDMA, provides information about your cat's kidneys, liver, and pancreas, as well as other functions of the body, such as blood sugar and hydration. A CBC can identify infection, inflammation, and anemia.

### **Infectious disease screening**

This screening indicates whether your cat has been infected with feline leukemia virus (FeLV) and feline immunodeficiency virus (FIV)—the most common infectious diseases in cats. It also indicates exposure to heartworm.

### **Fecal test**

This test checks for intestinal parasites that may live in your cat's gastrointestinal tract. Since they are usually hidden from view, the only way to detect and identify most intestinal parasites is by doing a fecal test.

**Regular total cost     \$219.59**

**Discounted preventive care bundle cost     \$164.70**

**Save  
\$55**
